<u>Online MeetArtist</u>

Project Statement:

You need to develop an application named "***MeetArtist***".

Abstract of the System:

The main objective of the system is to create awareness of the different art forms and help to bring artist in focus.

Pages to be created are as follows:

Home Page: -

- This page should have a background image related to Art and option for Sign-in and Sign-up.
- Even add some art form images or video with its's history.

Artist Registration: -

- Accept name/art form /Gender/ phone number/Email/password/confirm password.

Artist Login: -

- Artist is supposed to login using Email and Password.

Artist Dashboard: -
- Design profile
- Allow artist to upload images videos regarding art.
- Even publish regarding upcoming concerts or training sessions.

Artist and Art Form search: -
- Populate most frequently searched or liked videos, audios or images On web page
- even provide search option for User can search by artist name or Art form and even can like or dislike videos, audios or images
- If user tries to get contact details regarding artist provide option for Login and registration

User Registration: -
- Accept info like Name/email/contact no/Address/Profession.

User Login: -
- User is supposed to login using Email and Password to get contact details regarding artist.

(Bonus points for if you can implement the option for rating/comment and like functionality is working properly.)

Note: You are expected to create mock API's and perform read/write operations on them (Json Server) .
